I am fully aware that the list is not perfect (no list is) but I will continue to do what I can when I can move forward. List update: 04/25/20 Trades: Trades involving RB Matt Breida [Dolphins], WR Marquise Goodwin [Eagles], LT Trent Williams [Redskins] and CB Quincy Wilson [Jets] are available in this update. Retirement: LT Joe Staley has announced his retirement from the NFL. It has been lowered to 12 OVR and placed in the FA where it will not be signed by the A.I. in franchise mode. - Several players (UFAs) initially kept on the list due to mandatory limits on EA positional requirements have been removed. Huge thanks @gangstazz of Operation Sports

for their assistance with this. - All recent transactions, (i.e. S Michael Thomas signing to the Texans) have been included. - Around this moment of fear, the league begins to make cuts of players leading up to the preseason. If the lowest OVR beginners are cut, they will be used immediately for players in rounds 5-7. I still have a list of a few 2019 UDFA beginners that I use in the meantime. - I lowered Ryan Shazier and Telvin Smith to 12 OVR so his players don't reflect on Mode when the list is imported. - Several players in rounds 1-3 had classification adjustments made based on user recommendations and suggestions. This won't stop anytime soon, so several more beginners will be getting daily adjustments. Thanks to those of you on Twitter and Operation Sports who have been contributing. - NOTE: Due to the crazy EA limit of CAPs (Create a player) I WILL NOT BE ABLE TO MAKE THE 7 ROUNDS OF THE DRAFT. I've done all 7 rounds of the draft for the last 4-5 years, so this is the first time I'm unable to. I have zero control of that. I would literally have to tear every 2019 newbie to make it happen and I won't slaughter the list because of it. (more than half the time, 6th and 7th round of drafted players are cut into CFM regardless.) - I have no ability to control beginner development traits. You can only edit these features once the list is imported into franchise mode or via Draft Class. - Ages and date of births: Players in rounds 3 and 4 will begin to show an incorrect date of births. (I had to start using previous beginners to get these players added) so some of the dates of birth are incorrect, but the age they show is correct. - Rounds 5-7: I'll make sure specialists (kickers and punters) are added. He also had several rookie prospects in free agency who had 3rd and 4th round of qualifications in which they were not selected until the later rounds. I lowered their grades some and added them to their teams. After adding the specialists I was going through and add who I can when I can. THERE ARE NO PROMISES. Personal note: I will continue to update this list until the release of Madden 21 – HOWEVER this is my last year making lists. My 4-month-old son and my 10-year-old daughter need my best care and with my career in the fire department and my wife chasing their Teacher - it's time to hang up the keys. I've been making these lists since 1999 and started uploading them to community Downloads 4-5 years ago. It was an explosion and I appreciate the overwhelming support. jerwoods, rhouserjr0614, nbriggs413 and 6 others like this. Last edited by xAPathy13: 04-26-2020 at 02:29 AM. Among the 30-40 messages I'm getting per day, it's getting harder and harder to answer all of you that I'm used to doing. 9x out of 10 I have the same questions – even though they have been answered 1000 times. So if I don't respond back to you as fast as I used to please be understanding. - If you're getting error codes when downloading, try my backup file associated with each list. Or just keep trying (download eventually). If you're downloading from file but not showing up in your Upload/Delete folder – please refer to the workaround I've sent a few times in Operation Sports & amp; Twitter. I have this same issue, but it works for me 100% of the time. NFL Draft: - As mentioned earlier, rounds 1-4 are included now and will be the only rounds completed on the updated20 main roster. - Repeated reminder: EA only allowed 112 CAPs (Create a Player Slots) this offseason, so after the 112th rookie was created, I've started converting the lowest rookies in the 2019 rookie class to draft class year. This effects things like proper DBs and, of course, deeper depth, but it's the only possible way to get this year's beginners included. - I was able to include 20 additional rookies tonight from rounds 5-7. This includes all QBs, Kickers and Punters as well. Because of limited options going forward, I'll start hand-picking additional newbies based on user requests. \*\* As of tonight, the top 3 user requests were: WR K.J. Hill [Chargers], T/G Jon Runyan Jr. [Packers] and UDFA TE Thaddeus Moss [Redskins]. I don't really want to add Moss, I'm not even going to lie, so it's going to be the last in my priority, but I understand the popularity aspect. MY HUGE RECOMMENDATION AFTER TONIGHT'S UPDATE: If you want your team to have draft picks guaranteed from rounds 5-7 - take this update from tonight's roster and get the players you want on your converted team. I'm not promising they'll be in my end, but I will try. LET THIS BE MY OFFICIAL HEADS UP - Several first-round rookies were given qualifying adjustments tonight, including Tua Tagovailoa, Justin Jefferson and Jaen Renegar. A total of 12 beginners were reviewed. - From this week I will be for the new T-shirt # assignment, so please start throwing them my way if you get in sight of them before me. This update is reflected in the UPDATED20 list and is a backup file. The beginner-free list will be updated tomorrow (04/29/20) – thanks for your patience 156,000+ downloads and numbers follow rockets – for that I'm grateful to you all. List update: 4/28/20 \* RB Samaje Perine signed to the Bengals (claimed off waivers) \* RG D.J. Fluker signed with ravens \* DL John Jenkins signed to Bears \* DL Christian Covington signed to the Broncos \* LB Austin Calitro signed to the Bengals (claimed off waivers) \* WR Rashard Higgins re-signed with the Browns \* QB Kyle Shurmur released from Chiefs \* QB Manny Wilkins released from Packers \* RB Tra Carson released from Lions \* WR Steve Ishmael released from Colts \* released from Colts \* TE Dak Raymond released from Bears \* C Tanner Volson released from Giants \* DE Anthony Lanier released from Chiefs \* DE Deyon Sizer released from Broncos \* OLB/EDGE Jeff Holland released from Rams \* CB Derrick Baily released from Giants \* S Tashaun Gipson freed from Texans \* SS Obi Melifonwu released from Patriots \* P Daniel Colquitt released from Chiefs \* released from Jaguars \* LS Colin Holba freed from Giants' retirement : FB James Develin has announced his retirement from the NFL [Patriots]. It has been lowered to 12 OVR and placed in free agency where it will not be automatically signed in franchise mode. General roster notes: \* OLB/EDGE Markus Golden placed back on the Giants line. He was given a rare UFA bid by the team and so far, no other team has put an offer for him. Looks like he's back at the Giants. \* I'm getting a 50/50 response from people about Antonio Brown being in free agency. Obviously I can't please everyone, so I'll make the decision to keep it at 12 OVR. With his federal investigation still ongoing, his latest agent firing him and announcing publicly that his ex-client needs to seek advice and AB goes on Twitter and hit other star players for no reason recently - it's actually more unrealistic to keep him available free agency because it is immediately signed by teams in franchise mode. It's going to a while before your signs (if you do), but if you do .... then I'll add it back immediately. NFL Draft: \* I keep adding more rookie rounds 5-7. Tonight's update included some of the top requested players from all here, as well as Twitter and Xbox PM. Players like CB Bryce Hall, TE Thaddeus Moss, T/G Jon Runyan Jr., WR Donovan Peoples-Jones, WR Tyler Johnson and a few others were included in tonight's update. There are about 40 players from rounds 5-7 now included. - I'm still taking personal requests, though, so if a player gets multiple requests they'll probably get the idea. \* Here are some math for everyone: EA only allows 112 CAPs (Create a player slots). I used all 112. There are a total of 255 beginners being drafted which means they would need to use 143 beginners from the 2019 rookie class on the list in order to get this year's draft completed. 50-60 beginners is very feasible - but, the closer you get to 70, 80 and 90 used players, you start removing players who have pre-recorded audio, real faces and are key players on their teams. Basically you're slaughtering the list and most massive voters don't want to see key players with random player faces. \* Several rookie jersey # tasks are closing. I appreciate the help of users in Operation Sports and Twitter to get these numbers changed as soon as possible. \* TE Josiah Deguara has moved to the start of FB [Packers]. He will play the role of H-Back for the team which is also reflected in the depth chart. The team also confirmed this move. \* Qualifying reviews are ongoing. I know several WRs are still the most recommended editions – so I've been coming back and tweaking them on the fly. Phillybot207, hokupguy, Nyrain and 2 others like this. They traded a corner away for this selection so you have good opportunities to make the team! It will probably be the punt returner and backup kick returner as well as the second corner slot. Even with his size of 5'10 he ran a 4.28 40-yard dash and a 40-inch vertical. He seems to have a great shot at making the team! Super excited to use this list thanks!! I'll do a little less every day moving forward. As mentioned on Twitter – from now on, all additional updates going forward will take place only at night. I'm trying to slow transition away from list updates so I can spend more time with my family. I'm all moving away together after this season, so I appreciate the crazy support over the years. Roster update: 04/29/20 \* WR/KR Trevor Davis signed to Bears \* RG Zac Kerin signed to Titans \* DE Bryan Cox Jr. signed to the Bills \* CB Johnathan Joseph signed to the Titans \* CB Darryl Worley signed to the Cowboys \* Corey RB Clement re-signed to the Eagles General List Notes: \* Based on several requests, WR Antonio Brown was placed back in free agency. \* General reminders for repetitive questions: A.) I can't edit dev features. B.) Only rounds 1-4 will be completed in the UPDATED20 list. Several players from rounds 5-7 will be included though. C.) I am aware of download errors, and so is EA. I have no idea when EA will actually make a permanent fix, but there are some temporary workarounds. D.) I cannot replicate suitable rookie contracts, years or wages. There are ways to manipulate the numbers a little bit, but it's impossible to get everything right no matter what anyone tells you. EA does not give us these permissions to edit them during list creation. NFL Draft: \* Several players from rounds 5-7 were added tonight, including a UDFA's pair. Players like QB Anthony Gordon [Seahawks], MLB Kamal Martin [Packers], K Rodrigo Blankenship [Colts], CB Isaiiah Rodgers [Colts], RB Eno Benjamin [Cardinals], FS Josh Metellus [Vikings], WR John Hightower [Eagles] and another 3 were added late tonight. After tonight's update I got approximately 70% of the NFL draft included (178-180 rookies). \* Jersey assignments keep flying – I thank you all who have contributed. I updated several today, but if I missed anyone – hit me and I'll get corrected as soon as possible. \* Several of you have been texting me about beginner grades and statistics. For those of With whom I've been in discussion, several of the players adjusted tonight. \* As I am constantly having to explain to people: Rounds 1-4 are completed and several players from rounds 5-7 will be included, but none of the last 3 rounds will be 100% complete. EA provides a maximum of 112 CAPs (Create a player) and a total of 255 rookies were in this year's Draft. It would have to tear a total of 143 of last year's rookie class that exist in the game to make the whole project added - but doing so would be butchering several key players and pre-recorded audio from last year's rookie class. I'm not doing it. I'm turning several of them, though, so feel free to go and do it yourself as far as you want. Analyzer52, hardcor2, hokupguy and 4 other people like this. I don't like it too often and usually when I do, I'm on FIFA boards, but these lists have breathed new life into the game for me after walking mid-season because I lost interest and also the Saints were on a roll and I'm superstitious about playing sports games when the RL team is playing well since I always make a franchise that syncs as much as possible with real life.\* I haven't yet figured out how to use these in one but these with some slider changes at stake have now allowed me to get my football fix post-draft. I really appreciate it. It sucks you to see you go, but I get it man. I don't know how long you've been with your Department, but I'm trying to get there myself and I know all the work that goes into this, even more so during this mess we're all in. Take care of yourself and yours. - I know it's stupid, but it's still something. It could be that I'm a fan of Saints and we always look like such snakes. I do the same with LFC at FIFA, as soon as we put on a tall I put the game down to less than head-to-head with friends. I am also using this update to address a problem shaken by another list maker. Roster update: 05/05/20 - QB Andy Dalton signed to the Cowboys - QB Cooper Rush signed to Giants (claimed off waivers) - RB Frank Gore signed to the Jets - OLB/EDGE Aaron Lynch signed to the Jaguars (switched to 4-3 DE) - OT Sam Young signed to the Raiders - OT Josh Wells re-signed with the Buccaneers - OLB/EDGE Pernell McPhee has been re-signed with the Ravens - QB DeShone Kizer released from the Raiders - RB Jaln Moore \* released from the Jets (converted) - RB Mike Web RB\* released from Chiefs (converted) - RB Jeremy McNichols released from Jaguars - RB Marcus Murphy released from Panthers - WR Keon Hatcher released from Jets - TE Alize Mack\* released from Chiefs (converted) - TE Paul Butler released from Raiders - DL Nazair Jones released Of the Seahawks - DL Pita Taumoepeunu released from the Seahawks - LB TeVon Coney\* released from the Raiders (converted) - LB Quantin Polings released from the Raiders - CB Kyrn Brown\* released from the Jets (converted) - Player became one of the members of the draft class 2020. They will be reintroduced to the roster as one-year-olds if they sign with a team. Misc. Roster Edits: - WRs Quincy Enuwa and Josh Bellamy have been eliminated from the [Jets] depth chart. Her season is officially over after being placed on the reserve/PUP list. I'll probably remove them from the Jets roster considering Enuwa's career is in grave danger and Bellamy is a candidate to be released on an injury deal. - Giants, Jets, Jaguars and Ravens received depth chart adjustments. - Several veteran players had their jersey numbers corrected tonight. General notes and NFL draft: - My main roster UPDATED20 now consists of 1-6 rounds of the NFL draft with approximately 13 players from Round 7. A highly sought-after pair of UDFA are also included. Most recently added tonight were OLB/EDGE players Derrek Tuszka [Broncos] and Carter Coughlin [Giants]. I think I also added RB Raymond Calais [Buccaners] this afternoon. - Each newbie added to the list has Your body and team edited in detail based on a combination of your last couple games played in 2019. Includes helmets, masks and brand of shoes/gloves. All beginners in the top round have correct Of Births, however, the middle-rear round rookies that were not created from scratch, show their proper age as of today. - A lot of rookie sweater numbers have been corrected. Especially the Dolphins who triggered the biggest upgrade to all their players with jersey # assignments to rookies and veterans both. - Contracts and salaries: I have a little bone to choose from. Apparently contracts/salaries are the only thing that makes a list worth downloading according to someone who has ever changed me a bit on YouTube recently. I'll leave the names out of it, but let's say you're a well-known list maker who focuses more time on controversial player ratings and YouTube content, then they make your actual list. You know: I've never claimed that my list is the best for several-year franchise simulation. In fact, I've even boldly said more than once, my list is more suitable for Play Now or 1-maybe-2-year of franchise play. I've even deliberately gone out of my way to tell people to use their list if playing franchise mode for 2, 3 or even 4 seasons is what they prefer.... Our lists are completely different and each has its pros and cons. I've done countless hours like him. My problem comes from your statement: You are not going to draw attention to detail with any other list anywhere else. - This comes from the same guy who asks for money and pushed his rookie list with Tua throwing with his right arm.... We were a humble man. You work for PFF supposedly that is a reputational company – however, you are on YouTube bashing my list and then asking your followers for change as a homeless person. I've added a couple of UDFAs (Thaddeus Moss, Anthony Gordon, etc.), but for the most part any remaining rookie will go towards the completion of Round 7. Round 7 is 60% complete at the moment. You know who the list rankings are a little off the IMO. But you can always adjust, of course. Some players are ranked too low. I understand their concept but some are just a little too low. But everyone puts a lot of work on the charts and you can't take that away from any of them. Until you actually make the lists by yourself you can't really understand how much work this really is. you guys are right that the video came up in my feed that was like i have a gf now idk as mach longer I want to be doing this give me \$\$\$\$please and when I did a player it was WR J Curtis for C Davis the 7th round draft pick DT 05-09-2020, 10:08 PM MVP OVR : 1 Join Date: January 2009 Re : Madden 20 OS Community Roster [Xbox One] Originally published by Scott I'm talking about promoting their lists on their thread. oh my bad point was not to go down if anyone likes your work and we are on diff systems as well as 05-10-2020, 06:08 PM Pro OVR: 0 Join Date: Sep 2016 Location: Florida Re: Madden 20 OS Community Roster [Xbox One] Just an update – I wouldn't normally reveal too much of my personal life, but I have several private messages on Twitter Xbox and here I am struggling to respond again. My almost 5 months old is in the ER (now admitted to hospital) since yesterday. He won't be released until tomorrow. I can't visit it by all the rules and regulations with COVID-19. My wife is with it throughout the process, but the long short story is why I've been quite nonexistent the last few days before that. It should be fine, but without going into details, it gave us a good scare and will need an assessment later on. Since I'm not allowed to be in the hospital, I've been stuck at home and at night I've been slowly getting into Madden. I ended up using it as a stress relief before bedtime. I have round 7 approximately 70% completed as of now and I can finish completing all this before the end of the week. Give me a few days and I'll probably be a little more active again, but that's just a heads up. Obviously, the family is the first, but I'll be back soon I'm sure. The problem is that this restaurant bought the rights to make lasagna, so if we want lasagna we can only go to this place. 05-11-2020, 04:56 AM MVP OVR: 50 Join Date: Dec 2006 Location: U.S. Re: Madden 20 OS Community Roster [Xbox One] Originally Posted by xApAthyx13 Just an update – I wouldn't normally reveal too much of my personal life, but I have several private messages on Twitter, Xbox and here that I'm struggling to respond again. Nice touch of Madden 20. \*\* Playbooks: I'm enjoying a lot of the new additions. My only complaint is the franchise playbooks are much more realistic than the playbooks in MUT. \*\* They seem to have tuned in to the crazy amount of career game success. I really like that. Although the step is even much easier, I noticed that several plays Last season's glitch run are not as successful at present. Some new A.I. improvements along the defensive line shows and I really appreciate that. \*\* Escaping from the pocket is much improved in QB. Brought me nuts Madden 20 when 320 pound DTs were keeping speed with mobile QBs. I see a major improvement with speed, speed and chasing formulas. Pocket Qbs really feel like pocket qbs, but if they're open - they can actually realistically pick up 5-10 yards on foot just like in real life. \*\* Open field control over the offense is nice. There is a lot of improvement with the fluidity of the runners. My only complaint is the weakness when it comes to addressing it because of it. I understand X-Factors and skills will help with that, but there has to already be a basic tackle baseline available without the additions to a player. The runner's user control is a nice upgrade though. \*\* The Patio has a lot of potential. I actually liked that. Although absolutely suck it up right now. It brought some nostalgic feeling to real life throwing the football with friends and a mix of NFL Blitz combined haha. \*\* MUT has some new changes that I like. The ability to add any team chemistry to Master Cards is a nice change. I really hate how Madden basically left MUT and left an overwhelming amount of players with only 96-97 OVRs at the end of the season, so I hope they continue to work on it. Cons: \*\* Graphics for me right now are basically Madden 20.5. I have a feeling that there was zero emphasis placed on upgrading a lot to the current console, and I really look forward to a massive upgrade to the next gen console in November. So this is not necessarily a complaint, but just a place of conscience. \*\* Menu navigation has been horrible. Initially it's fine, but after a few minutes, menu navigation is delayed enormously and highlights. The worst menu delay takes place in MUT. \*\* Speed of defensive play. I'm not 100% sure this is a still cone, however defender user control takes a lot getting used to the open field. I'll have to play with it more, but the jukes and inability to tackle in the open field seems worse on Madden 21. (Did I think this was something they were working on?) Blitzing and sacks are still very common and easy to make. \*\* EA Rosters. This is always a cone in the release so don't read into it too much. Equipment\_Guru and others always come back with a great update close to Week 1, so I know this will be fixed. There are an overwhelming amount of missing players and un processing transactions that make the initial release list usable for franchise mode. \*\* Franchise mode. Sheesh.... same ol same ol. Not even a change in the bottom of the menu / appearance / navigation. We all know how the franchise community feels about this, so I'm not going to beat a dead horse. \*\* The overall game is slow. Maybe this is temporary, but you don't feel up to the speed of Madden's 20th game or real life on it. Maybe in this. I still have a couple of days to play with it. \*\* MUT cards – although animations are once again off to a good start, the art of the card.... I really hope you end up with better work soon because right now.... Sheesh. Boring. ripcandlestickpark and Codiak811 like this.
